AUTHOR	Taylor, Marvin J., Ed.
TITLE	Fact Book on Theological Education 1973-74.
INSTITUTION	American Association of Theological Schools, Vandalia, Ohio.
PUB DATE	[74]
NOTE	94p.
AVAILABLE FROM	American Association of Theological Schools in the United States and Canada, P.O. Box 396, Vandalia, Ohio 45377 ($3.00)
EDRS PRICE	MF-$0.75 HC-$4.20 PLUS POSTAGE
DESCRIPTORS	*Church Related Colleges; College Faculty; Educational Finance; *Enrollment; Expenditures; *Higher Education; Minority Groups; *Staff Utilization; Statistical Data; *Theological Education

ABSTRACT

This factbook presents statistical data concerning theological education for 1973-74. Tables cover: enrollment, sex, degree level, sex distribution, minority group enrollment, fulltime personnel, parttime personnel, employment of women, financial data, compensation provisions, revenue/expenditures, denominational affiliation, administrative officers' distribution, and faculty distribution. (MJM)

ACKNOWLEDGEMENTS

In behalf of all those persons who will use this resource on theological education, I express the deepest gratitude--

(1) to the administrators and staff of member institutions who supply the basic information;

(2) to Marvin J. Taylor, Associate Director of AATS, who has invested time and energy far beyond the call of duty in the writing and editing of this resource;

(3) to Charles E. Little of Health Management Associates for counsel about data processing and preparing the computer program;

(4) to Charlotte M. Thompson for invaluable assistance in checking and editing the data prior to computer work;

(5) to Arlene Galloway for her untiring work of assistance to the editor at every stage of the process but especially in the production of camera-ready copy;

(6) to Marilynn Horner for typing of copy;

(7) to the Andrew W. Mellon Foundation for encouraging the Association to undertake the project and for generous assistance in underwriting the costs essential to its achievement.

Jesse H. Ziegler, Executive Director
The American Association of Theological Schools

INDEX OF TABLES

VV	Library Staff Compensation by Regions (1973-74, Excludes Roman Catholic Schools), and by Highest Degree Offered (Accredited Schools Only)	85

Introduction

The same format has been preserved in this fifth annual Fact Book on Theological Education which has been published by the American Association of Theological Schools. This will facilitate comparisons beyond those which are included in the text. Data are derived from Fall, 1973 Annual Report forms: i.e., October, 1973 enrollment, 1973-74 personnel and salary information, and 1972-73 audited revenue-expenditure figures. All tables are labeled accordingly, both in the text and appendices.

Tables AA-JJ reflect 1972-73 data, with the per student and per faculty averages based on Fall, 1972 staff reports. These may be found in the 1972-73 edition of the Fact Book, if specific numbers are desired.

Table A lists all AATS member schools and indicates the basis for the classifications used in the appendices. These include size and status factors, as well as denomination and region. Table B provides enrollment data for four year intervals, beginning in 1956.

Certain arbitrary definitions have been necessary for the classification of schools. For example, a seminary is classified as a part of a university only if the larger institution possesses at least two other professional or graduate schools or departments. Schools are classified as related to a cluster only if the relationship includes at least two other seminaries. Denominational groups of schools are sorted and reported only if the denomination has at least four schools which are members of the association. Because the computer cannot accommodate dual denominational relationships of some schools, each has been classified on the basis of its primary student body affilliation. Thus, Louisville Presbyterian is included in the United Presbyterian grouping and Andover Newton with the United Church of Christ schools. Both Bexley Hall and Berkeley Divinity School, Episcopal seminaries, are not included in the Episcopal tables because of their relationships with Colgate Rochester - Crozer and Yale University, respectively.

This edition of the Fact Book also includes a set of tables providing data for accredited institutions distributed on the basis of the highest degree offered by

the school. These tabulations appear on the right side of each regional page in the appendices. The degree codings are B.D./M.Div.; Th.M./S.T.M.; D.Min.; and Th.D/Ph.D.

This is the second year that AATS has received student data regarding sex, race, and Hispanic-American origin. Thus far, this information has not been computerized, and it does not appear in the appendices. However, the most important categories have been reported in the text.

Several cautions are necessary in using the Fact Book. About 40% of the schools in the 51-150 size category are Roman Catholic, and the data reflect this. Four of the eleven schools (and 48.1% of the students) in the 501+ group are Southern Baptist institutions, and the category is influenced thereby. And one associate school with atypical financial characteristics has been eliminated from some calculations where averages would have been substantially altered. This fact is indicated in footnotes where appropriate, and some alternative tables provided.

The text has been prepared to identify and emphasize the most important data. Our purpose has been factual reporting. No value judgments regarding size of school, mode of financing, patterns of expenditure, or other characteristics are either intended or implied. Each reader is invited to make his own judgments in the light of the data presented about such matters in reference to his own perspectives on theological education.

ENROLLMENT

Total Fall 1973 enrollment showed an unexpected increase when compared with the record for the past several years. But the reader should not be misled by simply examining gross registration data, since they imply conclusions which careful analysis of the changes in the various categories of students do not confirm. Hence, it is important that each of the next several tables be read and compared to obtain an accurate understanding of the complete picture regarding theological seminary enrollment.

In terms of total numbers of registrants there was a substantial increase this year (1,887 persons, or +5.7%). By way of contrast, the increase in 1972 was only 220 persons comprising +0.7%. Comparable data for the past five Fall enrollment periods, 1969-1973, are reported in Table 1 below.

TABLE 1

TOTAL ENROLLMENT TRENDS, 1969-1973

Year	Number Schools Reporting	Professional Programs	Graduate Programs	Total
1969	170	25,950	3,865	29,815
1970	179	26,322	4,750	31,072
1971	187	28,208	4,608	32,816
1972	189	29,034	4,002	33,036
1973	190	31,156	3,767	34,923

It will be noted in Table 1 that precise year by year comparisons cannot be readily made, since the Association membership continues to grow. Hence, Table 2 shows the enrollment data for the same group of schools (189) reporting both in 1972 and 1973.

TABLE 2

ADJUSTED ENROLLMENT DATA FOR 189 SCHOOLS REPORTING BOTH IN 1972 AND 1973

	1972	1973	% Change
Professional	29,034	31,131	(+7.2%)
Graduate	4,002	3,767	(-5.9%)
Total	33,036	34,898	(+5.6%)

The general observation above about changes in various categories of students will be immediately evident here. While total enrollment did rise +5.6%, the graduate sector of that total (graduate masters, Th.D., Ph.D.) revealed an opposite pattern, declining -5.9%. This continues a trend across the past several years during which persons seeking these advanced degrees have been fewer in each successive enrollment period, dropping almost one thousand students since 1970.

Professional Degree Enrollments

The above observations about reduced graduate registration obviously imply that professional categories have continued to increase across the years. In tabulating enrollments the Association includes in this broad designation those programs which equip persons for ministry, either lay or ordained. Thus, not only the B.D./M.Div./D.Min./ and Ed. D. degrees are listed here, but so also are the one and two-year masters programs requiring only a baccalaureate degree for admission (M.A./M.A.R./M.T.S./M.R.E.,etc.). They have traditionally prepared candidates for religious education, social work, church music, and other forms of service.

TABLE 3

CHANGES IN NUMBER AND PERCENTAGE OF TOTAL PROFESSIONAL ENROLLMENT WITHIN VARIOUS CATEGORIES OF PROGRAMS

	D.Min.	B.D. M.Div.	M.A./M.R.E./ M.T.S.	Certificate, Diploma, & Special Students
1969				
Number	201	20,620	2,640	2,136
% of Total	0.8%	79.5%	10.2%	8.2%
1970				
Number	564	20,914	2,647	2,071
% of Total	2.1%	79.6%	10.1%	7.9%
1971				
Number	688	22,249	2,760	2,330
% of Total	2.4%	78.9%	9.8%	8.3%
1972				
Number	1,540	21,305	3,256	2,670
% of Total	5.3%	73.4%	11.2%	9.2%
1973				
Number	2,458	20,679	3,828	3,999
% of Total	7.9%	66.4%	12.3%	12.8%

Also included here are persons registered for regular credit but not seeking degrees, many of whom may be part-time. They are variously designated as special or unclassified students, although some may be enrolled in short course, non-degree programs for which some recognition such as a certificate or diploma is awarded. Table 3 shows some striking changes in four of these different professional categories across the past four years. The most startling is the emergence of the Doctor of Ministry (D.Min.) degree as a significant professional program, increasing more than ten-fold (from 201 to 2,458) between 1969 and 1973. Contrast this with the data in Table 3 for Bachelor or Master of Divinity (B.D./M.Div.) candidates. In the years since 1969, despite a twenty percent <u>increase</u> in professional enrollments, the candidates for the first ordination degree have increased only slightly in number (from 20,620 to 20,679) and <u>decreased</u> substantially in percentage of professional registrants (from 79.5% down to 66.4%). Thus, in a day when at least some denominations are expressing concern about a surplus of clergy, the rising seminary enrollments must not be misunderstood. Even when adjusted for the 375 D.Min. students who are prospective ordinands, it should be noted that the rise in total numbers of students is <u>not</u> indicative of an ever increasing quantity of new clergy. The professional enrollment increases are in other categories: for example, D.Min. registrants (85% of whom are seeking a second professional degree to enhance their ministerial skills); the one or two-year masters students (up 45% since 1969); and special, non-degree enrollees (+87% in the four years since 1969). Thus, it is evident that seminaries are increasingly diversifying their goals and the types or categories of students being served. For the great majority of candidates the Doctor of Ministry is an opportunity to match the desire for additional professional education with a new degree objective. But in addition to these persons, seminaries also are involved in other non-credit programs of continuing education which are not included in any of the statistical information reported in Tables 1-4. Last year a total of 21,753 persons participated in these educational events which may last from a single day to as long as several weeks duration. These details regarding continuing education are available in Tables C, D, and E in the Appendices (see item #17). From all of the foregoing it should be obvious that the term "theological education" is itself undergoing significant transformation. Once virtually

synonymous with pre-ordination education, it must now be broadened to include numerous additional facets of educational endeavor.

Graduate Degree Enrollments

By definition the Association includes in this sub-division programs for which the first professional degree is a prerequisite. These have usually been confined to some M.A. degrees, as well as Th.M./S.T.M., Th.D., S.T.D., and Ph.D. programs. As indicated above, there has been a steady decrease in numbers of persons in this total category since 1970. Please refer to Table 4 for specific data. Just as noted above within the professional sub-categories, the trends are not

TABLE 4

CHANGES IN GRADUATE ENROLLMENTS

	Th.D. S.T.D.	Ph.D.	Masters	Total
1969 Number	590	876	2,399	3,865
1970 Number	540	1,220	2,990	4,750
% Change	-8.5%	+39.3%	+24.6%	+22.9%
1971 Number	779	1,283	2,546	4,608
% Change	+44.3%	+5.2%	-14.8%	-3.0%
1972 Number	733	1,134	2,135	4,002
% Change	-5.9%	-11.6%	-16.1%	-13.2%
1973 Number	703	1,328	1,736	3,767
% Change	-4.1%	+17.1%	-18.7%	-5.9%

parallel in all graduate degree groupings. The overall one year decrease in all graduate numbers (-5.9%) was paralleled by a -4.1% reduction in S.T.D./Th.D. students. The reduction was tripled in the graduate masters' category, which went down -18.7%. However, precisely the opposite trend is apparent in Ph.D. enrollments. They increased (+17.1%) this year, reaching an all-time high in the years since AATS has been collecting such data. In the light of the highly publicized over-supply of teachers in the field of religion, this continued increase is surprising.

Sex Distribution of Theological Students

The Association has been collecting data on both sex and race of theological

school students for only two years. Hence no trends may be reported, although some comparisons will be apparent. Please refer to Table 5 for these data. The most obvious change is the sharp increase in numbers of women enrolled, up from 3,358 last year to 4,550. Even when a special non-degree program offered by one school and enrolling more than five hundred women is discounted, the increase is still quite evident. An additional 240 women are registered in the one and two year professional programs, as well as an even larger rise in the special and unclassified category. But the largest change is in the three and four year programs leading to ordination, one of the last arenas which have tended to be reserved for men. Here women increased from 1,077 to 1,484 candidates (+37.8%). Even with the influx of D.Min. students (who are included in this category) there was an actual reduction of almost two hundred men preparing for ordination. The slight over-all increase is explained totally by the 407 additional women registrants.

TABLE 5

DISTRIBUTION BY SEX AND DEGREE LEVEL OF ALL STUDENTS

	Women		Men		Total
	Number	%	Number	%	Number
1 or 2 Yr. Prof. Degrees					
1972	1,101	33.8%	2,155	66.2%	3,256
1973	1,341	35.0%	2,487	65.0%	3,828
3 or 4 Yr. Prof. Degrees					
1972	1,077	4.7%	22,031	95.3%	23,108
1973	1,484	6.4%	21,845	93.6%	23,329
Special & Unclassified					
1972	680	25.5%	1,990	74.5%	2,670
1973	1,409	35.2%	2,590	64.8%	3,999
Total Prof.					
1972	2,858	9.8%	26,176	90.2%	29,034
1973	4,234	13.6%	26,922	86.4%	31,156
Graduate Masters					
1972	353	16.5%	1,782	83.5%	2,135
1973	112	6.5%	1,624	93.5%	1,736
Doctors					
1972	147	7.9%	1,720	92.1%	1,867
1973	204	10.0%	1,827	90.0%	2,031
Total Grad.					
1972	500	12.5%	3,502	87.5%	4,002
1973	316	8.4%	3,451	91.6%	3,767
Total All					
1972	3,358	10.2%	29,678	89.8%	33,036
1973	4,550	13.0%	30,373	87.0%	34,923

When one turns to the post B.D./M.Div. programs, the situation is less clear. Last year exactly five-hundred women were enrolled (353 for masters and 147 for either the Th.D. or Ph.D.). In 1973 this dropped 36.8%! But please be careful to note the precise nature of the data. The decrease is in candidates for the graduate masters degrees. In an era when faculty positions are becoming very difficult to obtain and the credentials expected are rising sharply, far fewer men or women have any interest in that degree (the S.T.M. or Th.M.). Both decreased in the past year. But significantly the number of women seeking the doctorate rose sharply (up 38.8%). Thus it is apparent that both ordination and teaching posts are being more actively sought by women (each up more than one-third) in 1973 than was true even one year ago. It should be quickly noted, of course, that numbers and percentages involved still fall far below (6.4% and 10.0%, respectively) one-half of the population.

Black Student Enrollment

Data on black enrollment has been obtained during the past four years, and there has been a substantial increase in each of those periods. See Table 6 for these details.

TABLE 6

CHANGES IN BLACK STUDENT ENROLLMENT

Year	Number	% Change
1970	808	
1971	908	+12.4%
1972	1,061	+16.9%
1973	1,210	+14.0%

Additional sub-groupings of these data are reported in Tables C, D, and E (item #14) in the Appendices where black enrollment in various categories of schools (size, denomination, region, etc.) may be found. Comparisons may also be made with previous Fact Books to identify changes in enrollment patterns.

Table 7 contains data for sex distribution of black students within the various degree categories for both 1972 and 1973.

TABLE 7

Sex Distribution of Black Students

	Women		Men		Total
	Number	%	Number	%	Number
1 or 2 Yr. Prof. Degrees					
1972	33	26.6%	91	73.4%	124
1973	47	31.8%	101	68.2%	148
3 or 4 Yr. Prof. Degrees					
1972	34	5.0%	651	95.0%	685
1973	57	7.2%	738	92.8%	795
Special & Unclassified					
1972	22	15.8%	117	84.2%	139
1973	21	14.3%	126	85.7%	147
Total Prof.					
1972	89	9.4%	859	90.6%	948
1973	125	11.5%	965	88.5%	1,090
Graduate Masters					
1972	2	3.5%	55	96.5%	57
1973	2	5.4%	35	94.6%	37
Doctors					
1972	1	1.8%	55	98.2%	56
1973	6	7.2%	77	92.8%	83
Total Grad.					
1972	3	2.7%	110	97.3%	113
1973	8	6.7%	112	93.3%	120
Total All					
1972	92	8.7%	969	91.3%	1,061
1973	133	11.0%	1,077	89.0%	1,210

When compared and contrasted with Table 6, several parallels are evident. In each instance the percentage of women increased in almost all categories. The ratio of black women seeking ordination continues to be slightly higher than is true for all women in theological schools. Although still tragically small, the number of black women enrolled for doctorates rose from a lone candidate to six in 1973. The data for black males is similarly parallel to other information noted above.

Hispanic-American Enrollment

The data for the Hispanic-American student population are recorded in Table 8. As with information on sex distribution and race, this is only the second year that AATS has been supplied these data. Changes from 1972 will be readily apparent from studying this table. While the total increase was 46.6%, the 387 students represent a totally inadequate proportion of the Spanish-speaking persons in the United States and Canada. And while it is true that the doctoral enrollment

TABLE 8

SEX DISTRIBUTION OF HISPANIC-AMERICAN STUDENTS

more than doubled (157.1%), it still comprises only eighteen persons. This hardly bodes well for the future as seminaries seek to broaden their faculties by employing minority persons. However, even though the numbers are small, it is encouraging to note that the percentage increase of women students was substantial, moving upward from 5.7% last year to 9.6% in 1973.

Changes in Enrollments in Denominational Schools

Table 9 reports the changing patterns of enrollment in the selected group of denominational schools for each year since Fall, 1969. The data have been divided into professional and graduate categories to provide comparisons with other previous tables as well as more precision in understanding the changes in total registration. The table should be read with careful attention to the footnotes, since different numbers of schools were Association members in successive years. In contrast with last year (when seven of the twelve denominational groups reported losses), in 1973 eight of twelve show gains--some of which are quite large.

A small portion of the United Church of Canada increase (26 students) is explained by a different number of schools, but even without this the growth would have been substantial. Very small changes in numbers are apparent in Roman Catholic-Canada, Christian Churches, Presbyterian U.S., and United Church of Christ. In several instances these modest total changes hide decreases in graduate students who are offset by increases in professional categories. As noted last year (Fact Book on Theological Education, 1972-1973, pp. 2-3), this change may well be more apparent than real. Clergy who once enrolled in S.T.M./Th.M. (graduate) programs are now electing the professional D.Min.

When Doctor of Ministry factors are included in analyzing these data in Table 9, several more precise observations are in order. For example: American Baptist total enrollment declined slightly (-5.0%), but its D.Min. students increased 240%. Even when the Th.M. phenomenon noted above is discounted in this D.Min. enrollment, it is apparent that American Baptist professional students (i.e., M.Div.) declined substantially more than the overall 5.0% decrease noted in Table 9. Such specific detailed comparisons can readily be made by examining Tables D in the two Fact Books. Parallel observations may be made about the six Southern Baptist schools whose M.Div. as well as D.Min. registrants both increased substantially, more than offsetting the slight decline in graduate students. United Methodist data reveal two interesting statistics. The apparent increase in professional totals is more than explained by the D.Min. Without the registrants from several new "in-ministry" D.Min. programs, the decline in professional enrollment would have approached two hundred persons. United Methodist schools also ran counter to the general decline in graduate enrollments. All of these are increased doctoral enrollments.

The most striking illustration of the impact of Doctor of Ministry registrants on total enrollments is evident in the United Presbyterian group of schools. Table 9 reveals a rather startling increase of 26.4% in professional enrollment. Under careful analysis, this amounts to 357 additional persons, but the increase of D.Min. students over 1972 was 399 registrants. Thus, without the new Doctor of Ministry students there would have been a loss of 2.8% in

	1973-74	1,164	+ 3.0%	61	+ 10.9%	1,225	+ 3.4%

1. Includes six schools in 1969-71, five in 1971-72, three in 1972-73, and five in 1973-74.

2. Includes data from two schools in 1969-70, three schools in 1970-71, and four schools since 1971.

3. Includes data from five schools in 1969-72, but four schools in 1972-74.

4. Data from eleven schools in 1969-71, ten schools since 1971.

5. Roman Catholic - U.S. data based on 37 member schools in 1969-70; 42 in 1970-71; 47 in 1971-72; and 50 in 1972-74.

---

professional students! Thus, the data in Table 9 must be used cautiously in conjunction with Tables D in the two applicable Fact Books to obtain a totally accurate understanding of the enrollment trends.

Finally, it should be noted that at least three denominational groups of schools continue to show declining enrollments across the years reported. Once again this year the Lutheran Church in America schools reported fewer students. Although apparent in the graduate category also, it is especially evident in professional enrollment. The total decline has been 20.2% since 1969. Protestant Episcopal enrollment shows a similar slight decline again this year, as it has in previous years also. Since 1969 the total decline has been 7.3%. Similarly enrollment in Roman Catholic - U.S. theologates shows parallel reductions. However, it is significant to note that this year the same 50 schools reported a decline of only 56 students in professional programs (-1.1%). The major ingredient in this year's reduction was the loss of 242 graduate students. Since the

D.Min. has not yet become a factor in this shift in Roman Catholic schools, that explanation is not here applicable.

Size of School

Previous Fact Books have included tables reporting the interrelationship between size of enrollment and numbers of member schools. This table is not repeated this year primarily because the pattern has hardly changed in the five years for which data are available. About sixty percent of all seminaries together enroll only one-fourth of the total students. And eleven of the largest schools (over 500 students) number 27.7% of the registrants. Or stated differently, the largest eleven schools actually serve four hundred more students than the smallest 115 seminaries. The implications of these facts will be discussed later in the section on Finances.

NUMBER AND DISTRIBUTION OF PERSONNEL

Tables O through W in the Appendices present the details on numbers and distribution of seminary personnel in administrative, faculty, and library positions. Comparisons may be made with previous years by refering to earlier editions of this Fact Book where the tables are parallel.

TABLE 10

CHANGES IN NUMBERS OF FULL-TIME ADMINISTRATIVE, FACULTY, AND LIBRARY PERSONNEL CONTRASTED WITH NUMBERS OF STUDENTS

	Administrators	Full-Time Faculty	Library Staff	Total	Students	# Schools

1973-74	888	2,255	394	3,537	34,923	190
Avg. # School	4.67	11.87	2.07	18.62	183.81	
% Change	+2.2%	-2.8%	-3.3%	-1.6%	+5.2%	

Table 10 reports summary data from Tables O through W, indicating the changes in both total numbers and average number per school for each of the three staffing categories: administrators, faculty, and library personnel. The data obviously are not parallel in their changes from year to year. For the second successive year there has been a reduction in faculty and library personnel: -2.8% and -3.3% respectively per school. Seminary faculties this year are actually employing fifty-three fewer teacners full-time. Similarly ten fewer library staff are working full-time. Thus the well publicized financial crisis does appear to be influencing staffing decisions, with some vacancies not being filled and actual dismissals in other instances of necessary staff reduction. Yet there are two curiously opposite statistics in the data reported in Table 10. At the same time that the average faculty has been reduced by 2.8%, the average size of student bodies rose 5.2% (from slightly less than 175 persons to more than 183)! Even more curiously, full-time administrative personnel continued to increase for the fourth consecu-

tive year. Since 1970 the average administrative staff has risen 11% in number, while the faculty has decreased 1.1%, and library staff declined 4.6%. For the same period average student body size has risen 5.9%.

A final observation must be added about the reduction in full-time faculty members from 2,308 to 2,255 persons. As will be evident in Tables 11 and 12 there was a correspondingly large increase in numbers of adjunct, part-time teaching personnel used (from 1,661 to 1,911 in Fall 1972 and 1973 respectively). Furthermore, the full-time equivalency in teaching responsibility assigned to these part-time instructors also increased in an amount almost exactly equal to the reduction in full-time faculty. Thus, smaller full-time faculties do not necessarily imply fewer teaching personnel available. Rather it indicates an increasing dependence on part-time persons to fulfill instructional duties, a fact which may be related to the comparative costs involved in employing adjunct as compared with regular, full-time teaching staff. An equally plausible explanation may be an increased desire to utilize the professional skills of adjunct faculty for the improvement of the quality of education for ministry. Table 11 provides these comparative details. Note particularly how the percentage of all

TABLE 11

COMPARISONS OF FULL-TIME AND PART-TIME INSTRUCTIONAL PERSONNEL AS PERCENTAGE OF TOTAL TEACHING STAFF

	1970-71	1971-72	1972-73	1973-74
Number Full-Time	2,148	2,297	2,308	2,255
Number Part-Time	1,243	1,498	1,661	1,911
Full-Time Equivalent	357	429	470	522
Total, including Full-Time Equiv.	2,505	2,726	2,778	2,777
% of Full-Time Equiv. supplied by Part-Time Persons	14.3%	15.7%	16.9%	18.8%

teaching being done by part-time personnel has steadily risen across the four reporting periods (a 31.5% increase). The full significance of this phenomenon is obviously not available from the simple reporting of the statistical data.

Sex and Race Distribution of Seminary Personnel

Fall, 1973 was the third consecutive year that both sex and race data for administrative, faculty, and library personnel have been obtained. Table 12 records this information for all three years. Several interesting observations are immediately evident. For example, note the sex distribution percentage for all administrators across the three years. Despite the increases in numbers of persons employed each year, exactly 12.2% were women in each of the successive years! In reference to full-time faculty, last year we reported a decrease of eight women. In 1973 this situation was reversed. As noted earlier,

TABLE 12

SEX DISTRIBUTION OF PERSONNEL

faculties actually were reduced this year by fifty-three persons, yet twelve additional women were employed as full-time teachers. This raised the percentage of the total from 2.8% to 3.4%. A parallel phenomenon is also evident among full-time library personnel. While ten fewer persons are working in libraries, there are actually three more women in 1973 than last year. But one should not be misled by these cited changes. Together women constitute only 10.6% of the full-time professional employees of theological seminaries.

TABLE 13

Totals	247	47.9%	260	49.4%	257	50.3%

This represents an almost totally insignificant improvement of +0.3% in the two years since Fall, 1971.

Changes in part-time employment for women have been only slightly better. While it is true that in terms of percentage almost three times as many women are engaged as adjunct as compared with full-time faculty, they still constitute only 192 persons in contrast to 1,719 men. And this year there are actually fewer women serving libraries on a part-time basis than in 1972. Thus, the over-all data for the employment of women in the schools of theology shows no tendency to change very rapidly.

Table 13 provides more specific data for the various individual positions within the three general categories of administration, faculty, and library staff. As the continuing 12.2% each year might well imply, there has been almost no change from year to year for women employees in any administrative post. Numbers tend to vary only one or two per year, and the shift in percentage is similarly small.

The total employment picture for women on theological faculties once again changed only slightly. Curiously enough, the number of full professors actually diminished by three (from sixteen down to thirteen) despite the fact that full-time women teachers increased from 65 to 77 this year. In contrast, the number of associate professors doubled, from twelve to twenty-four. Thus, together these two normally tenured ranks rose from 28 women to 37 (+32.1%). The percentage of increase is deceptively impressive. These 37 persons still represent only 2.1% of the teaching personnel at these two ranks. And furthermore, this year there are actually two fewer women employed at assistant professor or higher level than was true two years ago. Thus, while there has been some upward movement in rank, the numbers of women teaching full-time have not really shown very much improvement. When contrasted with higher education generally in the appointment of women, theological seminaries do not compare very well.

The library situation remains similarly stable. Both the numbers of women staff and their percentages fluctuate slightly each year. The very slow trend is toward a few more women employees, but the shift is so small as to be virtually imperceptible. As noted in previous years, the highest position (librarian) continues to be primarily a male prerogative.

The employment picture for blacks (men and women) is even more bleak. The specific details appear in Table 14. While there was a very small increase in number of blacks holding administrative posts (two persons), they total only twenty four persons and 2.7% of the 888 employees. Full-time black faculty increased by only one person, and tenured blacks (full and associate professors) actually decreased by one. The slight rise in total numbers (from 137 to 146) was almost totally registered in the adjunct or part-time category. The situation in the libraries almost exactly parallels that in administrative posts. The percentage is 2.7% of the total in each case.

The import of these statistics is even more startling when one examines where they are employed. There are five predominantly black schools in the Association. Together they employ fourteen of the 24 administrators (58.3%), twenty-five of the 62 full-time black faculty (40.3%), and eight of the 13 full-time librarians (61.5%). Thus, black presence in the 185 primarily white schools is confined to only 52 persons, as compared with 47 in the black schools.

FINANCES - REVENUES AND EXPENDITURES

Last year we reported that the trend toward ever larger deficits had apparently been reversed, when a $5 million excess in expenditures was reduced by more than fifty percent. That was obviously a very significant improvement

TABLE 15

TRENDS IN TOTAL FINANCIAL DATA

(INCLUDES ALL SCHOOLS)

	Total Revenues	Total Expenditures	Surplus/ Deficit
1968-69	$ 95,585,000	$ 97,345,000	$-1,760,000
1969-70	107,485,000	110,417,000	-2,932,000
1970-71	113,510,000	118,574,000	-5,064,000
1971-72	127,389,000	129,859,000	-2,470,000
1972-73	138,420,000	140,855,000	-2,435,000

in the fiscal situation, one that was mandatory. 1972-73 saw only very modest change in the overall financial picture, with the previous $2,470,000 deficit being reduced by only about one dollar per student. Total revenues rose by +8.7%, while expenditures were increasing slightly less, +8.5%. A more substantial altering of this imbalance is clearly essential, since the cumulative deficit for the five year period has now reached almost $15 million. These data are indicated in Table 15 above.

A more careful analysis of the factors is evident in Table 16. Using the standard educational categories found in much higher education reporting, the Association collects information for Educational and General, Student Aid, and Auxiliary Enterprise revenues and expenditures. Reference should be made to Tables AA-JJ in the appendices for detailed data in each of these areas for the various groupings of schools based on size, status, denomination, and region. The $80 surplus in educational and general income and expenses actually improved by ten percent to + $88. The Student Aid situation also improved slightly, with that per student deficit being reduced by ten dollars, or 7.2%. But these achieve-

ments were virtually eliminated by the rising cost of operating Auxiliary Enterprises. While revenues did increase 13.4%, they were outstripped by a 16.0% increase in costs. Thus, the overall improvement was almost negligible. The observation of previous years retains its validity again for 1972-73; namely,

TABLE 16

TRENDS IN CATEGORIES OF FINANCIAL DATA: PER STUDENT BASIS

(INCLUDES ALL SCHOOLS)

	1969-70	1970-71	1971-72	1972-73
Educational & General

Surplus/ Deficit	- 98	-163	- 76	- 74

Student Aid programs must be better funded. With rising costs seminaries must certainly provide additional assistance in the form of grants-in-aid, but these become self-defeating unless comparable new funds are obtained to offset them.

Revenue/Expenditure Patterns and Size of Schools

Earlier in this Fact Book the variations in size of school were noted. Table 17 records the financial data related to this phenomenon. Once again there is an

TABLE 17

VARIATIONS IN PER STUDENT REVENUE/EXPENDITURES (EDUCATIONAL & GENERAL) BY SIZE OF SCHOOL (ALL SCHOOLS INCLUDED)

	50&under	51-150	151-300	301-500[1]	501+

1. One school with atypical financial characteristics has been eliminated from the 301-500 column in order to avoid distortion of the averages. Precise details regarding this may be found in Tables AA and FF.

orderly downward progression in per student data. In 1972-73 it actually cost 151.9% more to educate a person in a school of fifty or fewer students than it did in those above 500 in enrollment. While these smaller institutions were able to raise 121.8% more funds per student than the group of the largest size, these efforts fell substantially short of matching costs. The deficit was $137 per student. These data, of course, reveal nothing about quality of education or values related thereto. Some families of schools or individual institutions prize smallness and low teacher-pupil ratios, but they are by consequence called upon to raise larger sums of money to finance those expectations. One curious phenomenon in Table 17 is the fact that schools of 500 and more actually report lower revenues and expenditures per pupil. An initial inference might be an actual cash reduction in income and expenditures. This is not accurate however. Income rose +0.8%; expenditures declined -5.7%; and the number of students being served rose +4.1%. Together these factors produce the unusual characteristic evident in no other year by year comparisons in the table.

TABLE 18

2. Includes data for six schools in 1969-70; five in 1970-71; four in 1971-73.

3. Includes data for eleven schools in 1969-70; ten in 1970-73.

4. Includes data for 37 schools in 1969-70; 42 in 1970-71; 47 in 1971-72; and 50 in 1972-73.

Denominational Patterns

In addition to Tables 18 and 19, the reader should consult Tables CC and HH in the appendices for full details on denominational patterns of financing. It is readily apparent that variations related to size are even smaller than those among the denominational families of schools. In 1972-73 revenues ranged from a low of $1,903 to $6,313 per student from educational and general sources. Expenditures followed the same patterns. It may be noted that within this category - educational and general - seven of the groups of schools actually spent less money than was received. This varies from year to year as may be observed in comparing the various annual columns in Table 18.

As indicated in Table 16, this fact alone may actually be quite misleading. The financial data in aid to students and the providing of auxiliary services contribute much to theological education's fiscal stability. Hence, reference

2. See Table 18 footnotes for numbers of schools included each year.

---

should be made to Table 19 for the inclusion of this information in the total picture. For the second successive year, only one group of schools here exhibits a per student surplus. Paralleling the observation above, seven groups (six of whom had deficits) report somewhat improved circumstances when compared to the previous year. Yet even these facts may also give somewhat erroneous impressions. Such standard operating policies as the accumulation of reserves for unusual (and usually unbudgeted) major expenditures are simply not reflected in these customary categories for which the Association collects data. Wherever this commendable practice prevails, the actual situation will be less favorable than Table 19 implies.

Sources of Revenue

Tables AA and BB (those based on size and status of schools) reveal only minute shifts in percentages of revenue source from year to year. Yet some interesting comparisons are evident within the 1972-73 data. For example, per student income from tuition is very similar in both accredited and associate (unaccredited) schools. Schools over 500 in size receive substantially less

($500 as compared with $807) tuition per student. And institutions with the highest per student costs (those fifty and under in size) collect the second lowest tuition from each person. Similar observations may be made about the other categories. Denominational variations (Table CC) tend to be considerably wider. For example, the per student tuition ranges from a low of $121 in United Church of Canada schools to a high of $1,173 in inter- or non-denominational institutions. The percentages of total educational and general revenues represented here vary in precisely parallel fashion; i.e., from 3% to 33%. Endowment provides an even wider range of income (from $70 per student in Canadian Roman Catholic seminaries to $2,630 for Episcopal schools). Gifts and grants illustrate similar patterns. Tables DD and EE report revenue information on a regional basis. The lowest tuition ($325 per student) is in Canada, while the United States northeast ($1,277) and east ($914) are at the opposite end of this continuum. The most strikingly atypical percentage figure is the lowest endowment source (only 4%) in Plains region schools. This is less than one-fourth the second lowest regions (17% in the Great Lakes and Rocky Mountains areas).

Patterns of Expenditures

Except for the unexpectedly different situation noted above for schools with more than 500 students, expenditure patterns tend to be parallel from year to year. There are slight changes, but they are usually restricted to no more than two or three percentage points in the same item in successive Fact Books. Administrative costs range from 26% to 31%; instructional from 40% to 53%; and library expenditures from 8% to 10%. Thus, groups of schools arranged by size and status really do not exhibit great differences. Once again it is the denominational groupings which reveal the most variations. In contrast to a five percentage-point spread for administration, the denominational range is from 18% (United Church of Canada) to 35% (American Baptist). That latter figure represents a rather large increase, as well as the former being an even bigger decrease. The 1971-72 range was from 22% to 32%. Resources devoted to instruction vary substantially more (40% for Presbyterian-U.S. and Roman Catholic-U.S. up to 63% for United Church of Canada). Although library expenditures on a percentage basis show little change, more careful analysis indicates that there was sub-

stantial alteration in some groups of schools. United Church of Canada libraries received 34.7% less support. Although the decreases were markedly lower, American Baptist (-3.8%), Lutheran Church in America (-1.4%), and United Presbyterian (-3.5%), libraries also had actual cash reductions in the percentages indicated. In a period of rising inflation, when book costs are outstripping many other items in the cost of living index, such data are not especially encouraging for the future of theological libraries. In fact, all but two of the denominational groups of schools increased library support less than the percentage of total increase in educational and general expenditures. Regional variations within the United States tend to be closely parallel. Only Canada shows much of an exception. It spends a somewhat smaller percentage of its funds for administration, concentrating a correspondingly larger proportion on instruction.

COMPENSATION

In an era when inflation continues to rise, data on compensation for professional employees of schools of theology become increasingly important. Tables NN-VV present this complete information for administrative personnel, faculty, and library staff. For all three categories, total compensation is reported. This includes contract salary, housing allowance or value (if provided), and other fringe benefits except pension fund contributions. Compensation for administrators and library staff is for twelve-month employment. Faculty salaries include the same benefits but are for the nine-month academic year duties, even though these salaries may have been paid in twelve installments. Additional stipends for such things as summer teaching, etc. are not included.

Cash figures are, of course, misleading, since they do not represent the impact of inflation on real purchasing power. Consequently, each of the following tables includes the change in the Consumer Price Index during the preceding academic year. For example, the increase between July 1, 1969 and June 30, 1970 was +5.9%. This percentage is placed below the 1970-71 data for ready comparison with changes in salaries for that year, and an overall net real change is indicated for averages in each of the administrative, faculty, and library categories.

Administrative Personnel

Table 20 presents the salary data for the past five academic years by administrative post held. As in previous reports, actual dollar amounts as well as percentage of change have been included. It is quickly apparent that only once in four years (1972-73) was there a net real gain among administrative personnel in accredited schools. Thus, while salaries did continue to rise this year (+4.9%), inflation almost doubled (up from 3.0% to 5.8%) more than offsetting the increases. Across the four year period real purchasing power showed very little change (+0.8%). Similar comparisons may be calculated for each position. They reveal very little deviation from the overall averages.

The data for associate schools are somewhat different. Each category stands well below its counterpart in accredited schools (-19.3% for averages). Yet, despite the rapid increase in inflation, associate school administrative salaries

---

nonetheless represented a net purchasing power gain of +2.0% as contrasted with the -0.9% loss in accredited institutions this year. Denominational variations are considerably larger, ranging from a net real loss of -6.9% for one church to a genuine increase of +7.4% for another. A comparison of Table 00 in consecutive Fact Books will provide these data. Regional patterns reveal only three areas with net

real gains (Mid East, +1.8%; South East, +3.1%; and South West, +3.5%). The others sustained losses in purchasing power. See Table PP for these data.

Faculty Compensation

Table 21 provides data on trends in total faculty compensation across the past five years. For accredited schools' faculty it will be quickly apparent that

1. Footnote #1 in Table 20 is also applicable to this table.

1973-74 is the worst year of all five. In each preceding period, despite the pressures of inflation, the faculty averages did increase slightly in actual purchasing power. This year for the first time 1973-74 increases failed to match the cost of living gain. The net loss was -1.2%. A comparison within ranks indicates that this would have been even worse, without the larger increments given assistant

professors. For the second successive year the most significant changes occurred in the associate schools. Although their all faculty averages are 15.1% below accredited schools, this gap was reduced somewhat this year when associate schools showed a cash gain of +9.8% and a net real gain of +4.0%. Just two years ago accredited schools salaries stood at +23.7% higher. Thus, it is apparent that improvements in faculty compensation are progressing more quickly in the associate schools. Among denominational groups of schools, only three posted real gains in faculty compensation (Lutheran Church in America, +0.7%; Presbyterian Church-U.S., +2.6%; and the inter- and non-denominational group, +1.5%), all rather small. The other eight groups sustained real losses. Table RR provides these comparisons, as well as the range in average compensation (from $14,204 in Southern Baptist schools to $17,627 in United Presbyterian institutions). Regional differences are similarly wide ($14,525 in the Rocky Mountains to $17,534 in the Mid East). Four regions reported increases greater than the consumer price index growth (Canada, +3.6%; Mid East, +0.8%; South West, +1.7%; and Rocky Mountains, +2.6%). The others fell below the cost of living rise. Table SS presents these data in detail.

TABLE 22

TRENDS IN LIBRARY STAFF COMPENSATION[1]

(EXCLUDES ROMAN CATHOLIC SCHOOLS)

	1969-70	1970-71		1971-72		1972-73		1973-74

Associate Schools	7,620	6,909	- 9.3%	7,872	+13.9%	8,198	+ 4.1%	8,770	+ 7.0%
C.P.I. Change			+ 5.9%		+ 4.4%		+ 3.0%		+ 5.8%

1. Footnote #1 from Table 20 is also applicable to associate schools in this table.

Library Staff Compensation

Table 22 reports the trends in compensation for all library staff personnel for each of the five years. Persons seeking specific information for the various library positions will find these in Tables TT-VV, and comparisons can readily be

made by using the corresponding Fact Books published in earlier years. One rather obvious fact will be immediately apparent. Among administrative, faculty, and library personnel, it is only the latter whose salaries have risen more than the consumer price index in each of the past three years.

The Five-Year Compensation Record

Table 23 presents summary data for the five academic years since AATS began to collect salary information. It requires very little comment, since the percentages are quite clear. There has been substantial cash progress in each of

TABLE 23

FIVE YEAR COMPARISONS IN

COMPENSATION PATTERNS

(EXCLUDES ROMAN CATHOLIC SCHOOLS)

	1969-70	1973-74	% Change
All Administrative Avg:			
Accredited Schools	$14,470	$17,531	+21.2%
Associate Schools	11,494	14,153	+23.1%
All Faculty Avg.			
Accredited Schools	12,949	16,120	+24.5%
Associate Schools	10,905	13,693	+25.6%
All Library Avg.			
Accredited Schools	8,872	11,457	+29.1%
Associate Schools	7,620	8,770	+15.1%
Consumer Price Index Change: July, 1969 to July, 1973			+20.4%

the categories. Except for librarians in associate member schools, the greater progress has been among those with lower salaries. Yet despite this monetary improvement, almost no real gain in purchasing power has occurred. For administrators in accredited schools it amounts to +0.2% per year; for faculty +1.0% per year; for librarians +2.2% per year. Associate school administrators and faculty are better only by a fraction of one percent, and their librarians actually registered a net loss in purchasing power of -5.3% since 1969. Thus, despite significant efforts at improvement, virtually all of the change is absorbed by rising inflationary costs.

One final word regarding the impact of inflation on compensation for all seminary professional employees may be appropriate. Across the last academic year (July 1, 1972 to June 30, 1973) the Consumer Price Index rose +5.8%, almost double the +3.0% of the previous year. And the rate of increase has been continuing to accelerate. In the first five months of the current year (July 1, 1973 through November 30, 1973--the latest data available at this writing), the increase has been +4.1%, and the present annual rate of inflation is calculated to be at least 9.0%. This certainly should be among the factors considered in using the data available in this Fact Book when planning budgets and compensation for 1974-75.

TABLE B.

ENROLLMENT TRENDS OF MEMBER SCHOOLS

1956 - 1973

Data in the table are presented for selected years between 1956 and 1973. Where the first year of membership falls between those listed in the table, it is indicated by the year.

	Accredited Schools					
	1956	1960	1964	1968	1972	1973

Footnotes

1. Enrollment data reflect separation from Mennonite Biblical Seminary in 1960.
2. Pre-1968 enrollment data are combined totals of prior institutions.
3. Pre-1970 data are combined totals for the three institutions.
4. Fuller's total enrollment includes 110 students enrolled in regular seminary courses for credit located at four extension centers, as well as its School of Psychology students (69 in 1972, 71 in 1973) enrolled for degrees which AATS does not accredit.
5. 1968 figure is combined totals for Gordon and Conwell.
6. The Jesuit School of Theology in Chicago was formerly known as the Bellarmine School of Theology.
7. 1956 enrollment is combined totals of Pittsburgh - Xenia and Western which merged in 1960.
8. Enrollment data are combined totals of Yale and Berkeley prior to 1971 when they combined programs.
9. This school participates in the Conrad D.Min. program. Its enrollees in that program are listed under Conrad in the Associate Schools list.

Footnotes

1. Data prior to 1972 are those of Pine Hill, one of the institutions merging to form the Atlantic School of Theology.

2. The Bangor total includes 35 in pre-theological college programs operated under the seminary's auspices and 22 in post-theological study; all of whom are candidates for the M.Div. degree.

3. This school became an Associate Member in December, 1973. Hence none of its data are included in Tables C-VV, information for which was collected on October 1, 1973.

4. Conrad conducts only one degree program, the Doctor of Ministry. All of its students are jointly registered through one of its member seminaries. All enrollment data are included here for Conrad rather than these participating institutions.

5. St. Andrew's became an AATS Associate Member in December 1972, and its 1972 enrollment and financial data were not included in the 1972-73 Fact Book. Hence, all Revenue/Expenditure tables (AA-JJ) exclude data from St. Andrews.

6. St. Stephen's has changed its program to become primarily a continuing education center. Hence it has only limited regular degree enrollment. Its continuing education participants are recorded in item #17, Tables C-E.

7. The Episcopal Seminary of the Caribbean has become affiliated with the Centro Caribeno de Estudio's Postgraduados as its Faculty of Theology.

8. Our Lady of Angels has suspended active operation.

9. The Toronto School of Theology is the coordinating agency for seven theological schools. All student registrations appear in the data supplied by these individual institutions.

10. Data prior to 1971 are the combined totals of the two schools which united to form the Vancouver School of Theology.

11. This school participates in the Conrad D.Min. program. Its enrollees in that program are listed under Conrad in the Associate Schools list.

12. These schools were accredited in January, 1974. However, all 1973-74 data are included with Associate Schools.
